ELSEVIER

Int. J. Production Economics 49 (1997) 289–290

international journal of
production
economics

Contents Volume 49

Vol. 49, No. 1

Economic-statistical design of an adaptive $\bar{X}$ chart
S.S. Prabhu, D.C. Montgomery and G.C. Runger 1
Revision of industrial supply conditions and game theory
P. Gallo, E. Luciano and L. Peccati 17
Capacity driven due date settings in make-to-order productionsystems
L. Özdamar and T. Yazgaç 29
Integrating distribution, machine assignment and lot-sizing via Lagrangean relaxation
F. Fumero and C. Vercellis 45
A multicriteria approach to the selection of preventivemaintenance intervals
C. Chareonsuk, N. Nagarur and T. Tabucanon 55
Economic and strategic justification of AMT: Inferences from industrial practices
M.H. Small and I.J. Chen 65
Technical Note: A note on scheduling of two-stage flow shop with multiple processors
V. Suresh 77
Diary of Events 83

Vol. 49, No. 2

Selection of postharvest technology routes by mixed-integer linear programming
L.O.A. Maia, R.A. Lago and R.Y. Qassim 85
The optimum target values for a production process with three-class screening
M.K. Lee and J.S. Jang 91
Computational model for a Belgian chemical engineering plant cost index
L. Pintelon and K. Geeroms 101
Technological progress and optimal factor demand
K.O. Nti and K.K. Dompere 117
Order release and sequence-dependent setup times
H. Missbauer 131
A production order quantity model with stochastic demand for a chocolate milk manufacturer
E.L. de Castro, M.T. Tabucanon and N.N. Nagarur 145
Stock allocation in general multi-echelon distribution systems with (R, S) order-up-to-policies
M.C. van der Heijden, E.B. Diks and A.G. de Kok 157
Setup utilization as a performance indicator in production planning and control
R. Kuik and P.F.J. Tielemans 175
Diary of Events 185

0925-5273/97/$17.00 Copyright © 1997 Elsevier Science B.V. All rights reserved

Vol. 49, No. 3

A decision analysis model for comparing well completiontechniques
B.R. Stewart and J. Lee 189
An EOQ model for deteriorating items with a linear trend in demand and shortages in all cycles
T. Chakrabarti and K.S. Chaudhuri 205
An extended EMQ model for a failure prone machine with general lifetime distribution
C.H. Kim and Y. Hong 215
Scheduling in an automated flow shop to minimize cost: Backward- meta scheduling method
R. Kawtummachai, Y. Yanagawa, K. Ohashi and S. Miyazaki 225
Manufacturing setup cost reduction under variable lead times and finite opportunities for investment
B.R. Sarker and E.R. Coates 237
The restricted profit function and the application of the generalised Leontief and the translog functional forms
M.A. Bergman 249
An experimental evaluation of heuristics for scheduling in a real-life flowshop with sequence-dependent setup times of jobs
S. Parthasarathy and C. Rajendran 255
Assessing success factors for implementing CE: A case study in Hong Kong electronics industry by AHP
V.M.R. Tummala, K.S. Chin and S.H. Ho 265
Diary of Events 285
